Rappel de EyeCee ONE préchargé et EyeCee ONE Crystal préchargé

13 juillet 2023

Cher client, Chère cliente,

NIDEK procède à un rappel volontaire de lots spécifiques des lentilles intraoculaires (LIO) EyeCee ONE préchargées et EyeCee ONE Crystal préchargées dans tous les pays du monde où les LIO concernées ont été expédiées. Vous retrouverez une liste complète des LIO concernées en annexe de cette communication (voir l'annexe A).

Ce rappel fait suite à des rapports reçus par NIDEK et Bausch + Lomb faisant état de cas de pression intraoculaire élevée (PIO) chez des patients portant l'une de ces LIO. Pendant la période de mise en quarantaine des produits, NIDEK a mené une enquête interne et a identifié le lot de matériaux spécifique utilisé dans le processus de revêtement comme étant responsable du problème.

Un agent de revêtement (PVP) recouvre le tube de l'injecteur pour faciliter l'injection de la LIO. Suite à l'enquête, NIDEK a identifié que des LOTS SPÉCIFIQUES DE PVP présents sur l'injecteur avaient obstrué physiquement la voie de drainage de l'humeur aqueuse, ce qui entraînera probablement l'apparition d'une PIO anormalement élevée.

L'utilisation de ces produits peut présenter un risque de PIO élevée en permanence, et la PIO des patients portant ces lentilles doit être étroitement surveillée. Tout cas de PIO élevée nécessitera une consultation et un traitement immédiats par le chirurgien ou un autre professionnel de la santé qualifié.

La santé et la sécurité de tous les utilisateurs de nos produits sont notre priorité absolue, et nous prenons cette action volontairement car de tels cas sont pour nous d'une importance primordiale.

Tous les organismes de réglementation appropriés ont été informés de cette action. Les détails du rappel sont inclus dans cette communication, et aucun autre document ne sera par conséquent distribué.
